

LATEST TRAVEL UPDATE FOR THE BAHAMAS!

New Requirement for All Air Passengers Traveling from The Bahamas to the USA Starting- January 26, 2021

Starting January 26, 2021, **all air passengers traveling into the United States**, including by private flights, air charter, and general aviation aircraft, will be required to show proof of a negative COVID-19 test result or documentation of having recovered from COVID-19, regardless of vaccination status.

All passengers must complete an attestation affirming their compliance with the CDC requirements and provide it to their aircraft operator. The test must be taken within three days before their flight to the USA departs.

Before boarding the flight, they must provide proof of the negative result, or documentation of having recovered from COVID-19 to the airline. Fortunately, the existing Bahamas Travel Health Visa website will include the 'USA Arrivals Test' for a nominal fee.

[Bahamas travel update protocols.](#)

<https://www.bahamas.com/tourism-reopening>

The information seems quite complicated, however the Bahamas existing 'Health Visa' platform integrates the new CDC requirements seamlessly. We have tried to put all the USA and Bahamas travel information needed on one document, with links to all the various sites just in case you need more details.

Everything you need to know is on this document!

***Subject to Change**

Please see pages below...

TRAVELING FROM THE BAHAMAS TO THE USA:

***Starting- January 26, 2021**

All Travelers, two (2) years of age or older, returning to the USA from the Bahamas will be required to produce a negative Rapid Antigen Test no more than three days (72 Hours) prior to travel.

The current Bahamas Travel Health Visa will include a field for your departure rapid antigen test, which can be obtained at numerous locations throughout the Bahamas. (see below)

Airlines will be responsible for confirming the negative test result or documentation of recovery for all passengers before they board, and if a passenger chooses not to provide a test result or documentation of recovery, the airline must deny boarding to the passenger.

All travelers will be required to upload a negative Rapid Antigen Test results 48 hours prior to their departure flight back to the USA - <https://travel.gov.bs/>

INFORMATION FOR AIRCRAFT: TRAVELING FROM THE BAHAMAS TO THE USA: PILOTS / PRIVATE FLIGHTS / AIR CHARTER / GENERAL AVIATION-

Crew members on official duty, whether working or in an assigned deadhead status (transportation of a flight crew member as a passenger or non-operating flight crew member), are exempt from the testing requirement as long as they follow industry standard protocols for the prevention of COVID-19 as set forth in relevant Safety Alerts for Operators (SAFOs) issued by the Federal Aviation Administration (FAA).

[Click on FAA icon for details here-](#)

The NATA strongly advises operators to proactively reach out to international travelers to ensure they have a testing plan for their trip. Operators should also review their contracts and cancellation policies to ensure they account for any potential contingencies associated with this Order, including positive test results from crew or passengers, passenger refusal to test or provide attestation, or passenger failure to test in the required time window. Please consult with legal counsel for any necessary changes.
